1.Created 5 Classes :UserPage.java,AdminPage.java,Login.java,WebDriverLaunch.java,BaseTest.java.

2.In user page we are checking as an user whether the changed Address,Email and Phone Number are reflecting or not.

3.In Admin Page we are changing the Address, Email and Phonenumber and saving it and after that verify whether these fields have been updated or not.

4.In login Class, we are logging as admin.

5.BaseTest Class is the main class which is inheriting WebDriverlaunch Class and controlling the execution of all class by creating object of them and sending data from the properties file wherever its needed.

6.WebDriverLaunch class is used to initialize the browser and also loading the properties file.
